

**SOUTHERN
AIDS
COALITION**

CDC Funding Gaps in the South **Advocacy Toolkit: Alabama**

The Problem

The Deep South, including Alabama, has the **highest death rates** from HIV of any other US region.¹

In the Southern region, including AL, **more people die within 5 years** of an HIV/AIDS diagnosis than in any other US region.²

Alabama ranks **9th in the country** in the **rate of deaths** among persons living with HIV.³

Alabama ranked **13th in the country** in the rate of new HIV diagnoses in 2014.³

CDC Funding Inequities

- Community-based organizations (CBOs) are especially qualified to provide HIV testing and other prevention services for hard-to-reach communities.
- CBOs **outside** of the Birmingham-Hoover metropolitan area were **completely left out** in recent HIV prevention funding from the Centers for Disease Control and Prevention (CDC). (Grant No. PS15-1502)
- CBOs in other Alabama cities were **not** eligible for funding under PS15 -1502.
- **74% of new HIV diagnoses** in AL in 2013 were in areas **left out** of funding.⁴
- **68% of people living with HIV** in AL in 2013 lived in areas ineligible for funding.⁴
- Despite high rates of new HIV diagnoses and people living with HIV, only one Alabama-based CBO (in Birmingham) received funding pursuant to PS15-1502.⁴

Percent of People Living With HIV Living in Areas Ineligible for CDC Funding⁴

What do we want from the CDC?

1. HIV prevention grants for community-based organizations located in smaller cities and rural areas in AL.
2. Community-based organization prevention dollars that are distributed consistent with the geographic distribution of the HIV epidemic.
3. Grants should include the opportunity to get technical assistance for smaller community-based organizations.

Make Your Voice Heard

We are collecting letters to send to Dr. Eugene McCray, Director of HIV/AIDS Prevention at the CDC, from concerned individuals, including people living with HIV, friends and family, and advocates.

Send us your letter by April 1, 2016!

Send to: Southern HIV/AIDS Strategy Initiative, Duke Law School, Box 90360
